For Immediate Release

Missouri Citizens Will Protest Dr. Anthony Fauci at Washington University Medical School Commencement

St. Louis, MO (May 12, 2023)- *Nations in Action* and *Missouri Stands Up*, grassroots organizations of Americans seeking transparency in government, will host a *Restore Health Freedom March and Prayer Fest & Rally* to provide remarks on the commencement address of Dr. Anthony Fauci to medical school graduates at Washington University School of Medicine on Monday, May 15.

To set the record straight on Fauci's gross misrepresentation of the Covid-19 virus and handling of the vaccine response, they will also hold an alternative commencement address for graduates at Shaw Park across the street from the university so graduates may hear from other top medical experts on concealed proven medicines, adverse reactions of vaccines and the influence of big pharmaceutical companies and bureaucrats manipulating information for the government response.

Fauci is the former director of the U. S. National Institute of Allergy and Infectious Diseases and controlled billions of dollars of federal funding related to healthcare research and treatment.

"Dr. Fauci represents everything that is wrong such as the lack of transparency in medicine and government today," said Maria Zack, founder of Nations in Action. "Starting with his mishandling of the AIDS crisis to how he failed the world on the COVID-19 pandemic, he is the epitome of a healthcare system that is profit-centered instead of patient-centered.

"History will one day show that Anthony Fauci was not a man to be celebrated but instead someone who destroyed millions of lives across the globe by his interference and collusion in our once-great healthcare system," Zack said.

On Monday, hundreds of concerned citizens and unbiased medical experts will gather at Shaw Park and march along Forsyth Street to Olympic Field where the Washington University School of Medicine commencement will start at 3 p.m. The peaceful demonstration is not only to protest Dr. Fauci's presence but also the fact that the University is devaluing a diploma by awarding him an honorary degree.

At Shaw Park, a host of healthcare speakers will address the public and be available to educate medical school graduates from 11 a.m. to 6:30 pm. They will discuss issues such as the Covid-19 vaccine, preventative healthcare measures and historical treatments currently opposed by many in the medical industry such as Hydroxychloroquine and Ivermectin because they do not generate big profits.

Speakers will also discuss government interference in the doctor to patient relationship.

Among those speaking at the *Restore Health Freedom March and Rally* include:

- Dr. James Thorp, formerly of St. Louis and now in Florida and an obstetrician and gynecologist, and a specialist in maternal fetal medicine. He is the author of *Totality of Evidence*, a book that documents a “substantial massive increase in infertility, miscarriage and fetal death” related to the Covid-19 vaccine. He has testified before the United States Senate on his findings.
- Dr. Rashid Buttar, as a graduate of Washington University in St. Louis and now living in North Carolina, knows the requirements to be a good doctor and how to identify the needs of the individual patient. He questioned the safety and efficacy of the rushed covid vaccine. Dr. Buttar’s concern grew over government employees interfering in doctors’ treatment of patients and stripping doctors of prescriptive authority over bureaucrats especially in the treatment of Covid-19. (He will join by Zoom)
- Dr. Gaston Cornu-Labat, a Texas surgeon who has been among the leaders in the medical field warning about the Covid-19 vaccine’s mRNA component. He also participated documented clotting issues found in patients who have died suddenly and discovered during autopsies. Dr. Cornu-Labat will be available all day of the event for in person interviews and to counsel the new doctors on best practices.

The theme for the Rally is Psalm 127:1 Unless the Lord Builds the house, the builders labor in vain. Unless the Lord watches over the city the guards stand watch in vain” and attendees will be praying for the new doctors’ success, ability to discern truth and to do no harm when confronted with conflicting information from government.

Zack encourages participants to arrive early and gather to hear speakers and show their support for truth in medical science.
